PROFESSIONAL SUMMARY

Skilled Full Stack Developer with strong expertise in modern frontend technologies including **React.js, Next.js, TypeScript, Vue.js, and Tailwind CSS** for building responsive, SEO-friendly, and dynamic user interfaces. Proficient in backend development using **PHP, Laravel and Node.js**, with hands-on experience in designing scalable server-side architectures, RESTful APIs, and microservices. Experienced with a wide range of databases including **MySQL, PostgreSQL, MongoDB, Firebase, and DynamoDB**, with a solid understanding of both relational and NoSQL data structures.

TECHNICAL SKILLS

Frontend Development:

- React.js, Vue.js, TypeScript, JavaScript, jQuery, Next.js, CSS, Bootstrap
- Material UI, Bootstrap, CSS3, Tailwind CSS, SASS
- Responsive & Cross-Browser Development, UI/UX Optimization

Backend Development:

- PHP, Laravel, Node.js, Express.js,Nest.js, WordPress
- REST API, GraphQL, RabbitMQ, Microservices Architecture
- Custom CRM Development, Multi-Language Site Implementation

Database & Big Data:

- MySQL, PostgreSQL, SQL Server, Mongo DB, Firebase, Dynamo DB
- Redis, RabbitMQ, Data Caching Strategies
- Big Data Processing and Analysis

Cloud Technologies:

- CI/CD Pipelines, Docker,Git Version Control
- AWS and Google Cloud platform
- Website Deployment on cPanel, Nginx, and Apache Servers

Other Expertise:

- Payment Gateway Integrations (Stripe, PayPal)
- Social Login Plugins, Push Notifications, Web sockets
- Web Scraping & Automation Scripts

EDUCATION

Bachelor in Computer Science

Federal Urdu University, Islamabad, Pakistan (2012 – 2016)

WORK EXPERIENCE

Senior Full Stack Developer

Newrich Network (Canada) | July 2021 – Present

- Architect and develop high-performance applications using P**HP, Laravel, Node.js, Vue.js, and React.js**.
- build complete MERN applications—from database design to responsive UIs and seamless API integration.
- Create fast, SEO-ready interfaces using **React TypeScript, React Next.js**, and modern design systems.
- Implemented **big data processing** solutions to manage large-scale datasets efficiently.
- Develop secure APIs with Node.js and Laravel, handling everything from authentication to real-time data flow.
- Used static and server-side rendering to enhance performance and SEO for high-impact app
- Utilized **web sockets** for real-time communication in web applications.

Full Stack Developer

IG Tech Services (Pakistan) | May 2019 – July 2021

- Engineered applications using **PHP** and frameworks like **Laravel,** reducing development time by half.
- Designed and implemented **RESTful APIs** to enable seamless communication between frontend and backend.
- Optimized database queries and structures for **MySQL, PostgreSQL, or NoSQL** to improve performance.
- Utilized UI libraries like **Material UI, Mantine, and Tailwind CSS** for modern designs.
- Managed application state with **Vuex, Pinia, Redux, or Context API** for efficiency.
- Implemented **message queues** for asynchronous processing in applications
- Designed and implemented **RESTful services** for application integration
- Implemented **performance optimization** strategies for web applications

Web Developer

Phebsoft Private Limited (Pakistan) | April 2017 – May 2019

- Built web-based applications using PHP frameworks like Laravel, CodeIgniter and WordPress
- Managed databases using MySQL and PostgreSQL.
- Developed and consumed RESTful and SOAP APIs.
